STYLE

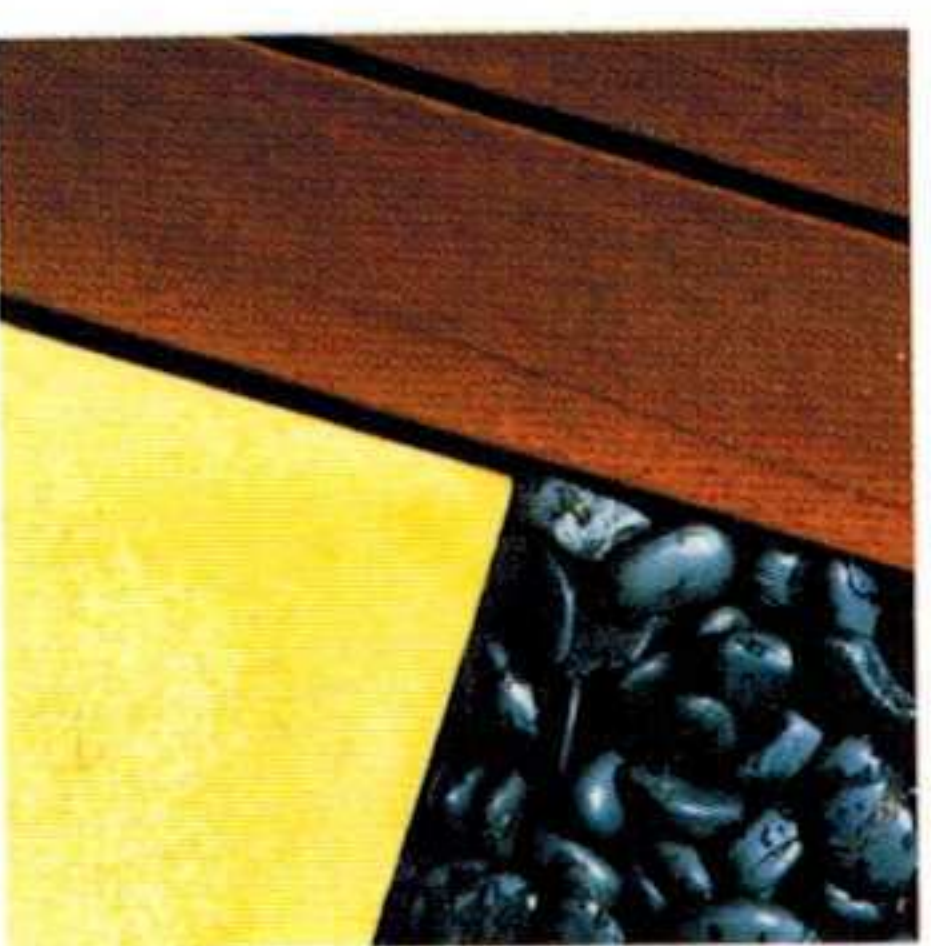

Only the best products are used to create Edenstone pavers. Edenstone will provide a sophisticated and stylish finish to any entertaining or pool area or functionality for pathways and driveways. The possibilities are endless. For consistency, longevity and a premium finish all textures and sizes are made to match. Colours are made using the same mix, though the use of natural sands and colours will occasionally produce slight variations.

ENDURANCE

The Edenstone range is at the same time contemporary, classic and hard-wearing. It's suitable for both commercial and residential spaces. Edenstone is a quality product and regular care and maintenance, will ensure your paved area always looks chic. The Edenstone Masonry Guide provides a how-to for the treatment of spots and stains.

QUALITY

The Edenstone range of products is designed to suit new and established homes. There are several textures and six standard colours to choose from. Pavers range from classic cobblestones to larger sized square pavers. Pool coping includes bull nose, square edge and pool skimmer pieces. These terrific design creations allow you to finish your outdoor living space flawlessly.

QUICK FACTS

- Edenstone Masonry pavers and products pass the Australian Standards tests for dimension, slip resistance, strength and durability. Plus they're salt safe.
- As a handmade mix of natural materials and cement, some colour and size variations are expected. Industry standards allow minimal differences. It's a good idea to blend pavers from all pallets as the job proceeds.
- Check your laying surface is prepared appropriately for its intended purpose. A pool area is different to a driveway.
- For fixing coping to substrate speak with your supplier as it's imperative a quality adhesive is used.
- More sizes are available ... just ask your supplier.

As with most paver products, care is crucial for longevity. We strongly recommend sealing of pavers to maintain quality condition of Edenstone product. For more information on sealing and to assist in correctly laying and maintaining a quality outdoor area with Edenstone Masonry product, please request a copy of Edenstone Masonry's "General Conditions & Laying Procedures" Guide. **Available from your supplier, or simply visit www.edenstone.com.au**
