

Basalt

Information and Features

Basalt pavers provide a truly natural and unique looking solution to any outdoor area or pathway. Cut from hard volcanic stone, Basalt pavers bear the marks of natural pitted lava veins which creates a beautiful natural look that cannot be reproduced with man-made pavers.

Basalt is the perfect solution for pathways, entertainment areas and look especially good as stepping stones.

Suitability

- Outdoor Entertaining Areas

Approx. 4 pieces per m²

30mm Thick

Basalt Boulder Stepper 40mm Thick

Regular 400-500mm

X Large 500-600mm

Stone Edges

300x100x100mm

PLEASE READ PRIOR TO PURCHASE - Material Consideration - Due to the nature of natural stone, it is expected that products will vary in appearance, colour, texture, grain, shape, size and markings. No two pavers or tiles will be the same, and that is what provides the beauty of natural stone products. It is a good idea to blend tiles / pavers from all crates prior to laying. Products have an acceptable size tolerance of up to +/- 2.5mm, so it is important to arrange pavers by thickness and incorporate a grout space when laying. Small amounts of chipping as well as natural marks are considered acceptable in natural stone products. It is the responsibility of the user to inspect the tiles / pavers prior to laying as claims will not be honoured after products have been installed. Excessive chipping, cracks or size variation may be eligible for claim. We recommend sealing all pavers and tiles.
