

Guide to Landscaping Products – Part 2

Sands

Paver bedding sand: Coarse Sand recommended for under pavers and around pipes.

Brickies Loam: a high-quality mix of sand and loam for mortar and bricklaying, much sought after by tradesman. Also used under above pools due to its great compaction and also good minimising of damage to pool liner.

Washed pit/plasterers sand: Salt free used for builder's mix, rendering, tiling and drainage. Clean and free of contaminants, Suitable for sand pits.

White silver sand: Fine white Sand which is ideal for making up white mortars or children's sandpits.

Paver Medium sand: An alternative to Paver Bedding Sand and also used to top dress lawns.

Paver sand: 20kg bag product that is a special blend of graded fine sands and additives which inhibits the growth of weeds and the infestation of insects (ants) by forming a firm but pliable joint between pavers.

Decorative Pebbles

We have greatly expanded our range of decorative bulk pebbles, which is sure to suit any landscape design and budget. Up to date exclusive gravels and colours available. Please contact us to check the current range.

Gold coast 20mm: 20mm semi rounded stones with earthy tones suitable for paths and driveways, Also comes in a 10mm.

Gold Coast Pebbles 25mm – 75mm: Create a river bed feature in your own backyard. You can use this product to break up large areas of bark, or for edging borders around boulders and paths.

Natural River Pebble 20-40mm: Beautiful earthy tones in browns, yellows, reds, oranges and earthy blues. Perfect for a natural look in gardens, rockeries and pathways.

Tumble Sandstone 20-40mm: Tumbled sandstone pebbles with tones of creams, browns, whites, oranges and pinks; Terrific for any landscaping idea.

Tumble Sandstone 50-100mm: Larger tumbled sandstone with tones of creams, browns, oranges and pinks. Ideal for standout landscape designs, also can be used for gabion cages.

Tumble Black 50-80mm: A tumbled stone with dark grey colours is sure to make an impact in your landscaping design. Great for around pools as it looks stunning when splashed with water.

Tropical Bronze 20mm: Beautiful rounded pebble with colours of terracotta, gold, copper orange and whites.

Bagged Decorative Pebbles: We also carry a wide variety of decorative pebbles with a great selection of colours. Great for pot plants, small gardens, Japanese gardens, between pavers, ponds or any landscape feature you wish to enhance.

Gravels and Bases

Caramel Swirl 20mm: A stunning gravel with colours of purple, cream and yellow; Also comes in a 10mm.

Blueberry Crush 20mm: A Beautiful white coloured crushed rock, has a subtle white with slight blue/grey tints; Also comes in a 10mm.

Twilight Crush 20mm: A beautiful decorative gravel made from rounded sandstone, which has a mixture of glistening colours (gold, mauve, cream and pinks).

Drainage gravel 20mm: Used as a drainage gravel in sillage pits, trenches and as a backfill material behind retaining walls; Also comes in 10mm and 5mm.

Drainage Recycled 20mm: Crushed concrete to 20mm, used as a cheaper alternative to Drainage Gravel (Blue metal).

Road Base: Versatile as a bottom course fill, under pavers or an economical fill under decorative gravels on driveways.

10mm concrete blend: A small gravel and sand cement mix for garden paths and handy man jobs, just add cement with water and stir!

Crusher Dust: Use this product as a bottom course under paver sand and pavers. However, if you lay pavers directly on crusher dust there is a chance that the colour could come up through the pavers. Also used for paths and driveways.

Deco: (Decomposed granite) used as a surface in tennis courts, this can also pack down to form a good looking path or driveway.

Rocks

Mossy Bush Rocks: These are man hand able so they can be picked out individually by you, sold in pallet proportions. Great for waterfall features or features in gardens and flats make great stepping stones, Also comes in **River Rocks** and **sandstone rocks**.

Timber

Koppers logs: As a versatile product for use in retaining walls and around the garden, these products are pressure treated with C.C.A. chemicals and are guaranteed for 40 years.

Treated Hardwood Sleepers: Are dip treated to H4 in ground grade, sleepers are classed as second grade by the timber industry. First grade would almost be double the price, as a rule if a sleeper has one good face and one good side it is acceptable for landscape use; Please note sorting through stacks is not allowed.

Treated Pine Sleepers: Are pressure treated to grade H4-H5 depending on the thickness of the sleeper.

Miscellaneous

Weedmat: Is not generally required if you are mulching to a depth of 100mm, in fact it will inhibit natural soil humus composition. However, this product is definitely better than laying plastic which should not be used, as plastic will sour soil and not allow correct drainage.

Bidim: Ideal to use instead of weedmat for steep slopes, Bidim tends to not slide when using mulch on top. Also great to use with poly slot drains and behind retaining walls, this will help stop dirt seeping through wall.

Poly Slot Drains: Are used for sub surface drainage by digging a trench (200mmx200mm) falling to the street or sillage pit. Lay slight covering of gravel on the bottom of the trench, then lay your pipe down and cover with more gravel. A sock or thin strip of bidim over the top with a covering of a screened sandy loam will complete the job, use poly slot drains for behind retaining walls as well; See our price list for a complete list of sizes available.
