DELIVERY: BRISBANE METRO AREA \$110 for the first pallet, \$22 per pallet thereafter. Max. load of 9 tonne per load and 8 pallets
OUTER BRISBANE (Mango Hill, Burpengary, Ashmore and surrounding areas): Prices on application

INSTALLATION GUIDE :STONE PANELS

1. **Wall/Substrate Preparation:** The wall/substrate surface should be clean, flush and free of dust and loose particles. Pre-existing surface coatings or paint should be thoroughly removed. It is recommended that a bondcrete sealer is applied to the substrate if the panels are being adhered to a vertical wall.
2. **Choosing an adhesive:** Your local hardware store or Retail Tile outlet will be able to advise you on which adhesive to use as long as you stipulate whether your feature panel is outside, inside or being used in a water feature and that it is being used on stone panels.
3. Using a trowel, evenly apply the adhesive over the entire back of the panel and press the panel into position.
4. Lay your panels in an irregular pattern to avoid emphasizing any of the natural defects in the stone. It is for this reason that the stretcher bond is **not** recommended.
5. Use a wet saw with a tile cutting blade for any cuts or mitering.
6. **Sealer:** Application of a penetrating sealer such as Klen's Pinnacle, Tuscan, or Stirling Sealer is recommended on the finished wall.
7. Any future leeching of rust from the stone can be removed easily with Klen's 'Anti-Eff'
