HIGH PERFORMANCE BUFFALO

If you are after a turf that is high performance, has a luscious green colour and very little maintenance, Sapphire buffalo is for you. Being the only finer textured buffalo in the world that has a shade tolerance of 70% each day makes for a perfect lawn. Generally, Sapphire is a mow and grow grass that requires little work. With a luscious deep green colour and a tinge of blue (sapphire), it's sure to make your lawn stand out from the rest on the street. Colour is maintained throughout the Winter months also providing your lawn has been fertilised in the month or two leading up to the cooler weather.

EXCELLENT QUALITIES

Due to the deep rooted structure, Sapphire is drought tolerant and also is excellent at out competing weeds once established. Sapphire has an excellent wear resistance and due to this is able to recover well from any injury that may be caused. Being a salt tolerant grass means that you can enjoy the beauty of Sapphire in any type of area, whether you may live on the coast or inland. Sapphire can thrive in hot dry desert conditions, however also in cold frosty climates making this a suitable grass for any environment.

RECOMMENDED CARE REQUIREMENTS

- Recommended mowing height is 35-40mm in the sun and 40-60mm in the shade
- Mow every 1-2 weeks during Summer
- Mow every 2-3 weeks during Winter
- Fertiliser application recommends 2-4 per year
- Low water usage
