

SuperPlinth

SuperPlinth is installed at the base of a fence, particularly in situations where the fence needs to be raised or elevated. Made from composite materials it services multiple purposes such as providing stability to the fence, preventing soil erosion and enhancing the overall appearance of the fence line.

PRODUCT FEATURES

Easy to Install

Incredibly
Strong

Versatile

SuperPlinth

We understand the challenges you face on the job site. That's why we have engineered SuperPlinth to be:

Easy to Install: Our modular design and lightweight material make installation a breeze, saving you time and effort.

Incredibly Strong: The SuperPlinth is made from FRP Composite materials, providing exceptional strength and durability. This means your fence bases will withstand the test of time, even in harsh Aussie conditions.

Versatile: Whether you're working on a residential, commercial or rural project. SuperPlinth is the ideal solution for raising or levelling fence lines.

SuperPlinth is available in 2.38m and 3.16m lengths.
