STEEL H BEAM POSTS GALV. WITH REO 100mm (Below are not the length of the post)		CODE	KG	RETAIL
100mm - Wall height 400mm	<p>Why the Reo? It has been calculated that the initial 350mm of subterranean post bear the load of a retaining wall, beyond this point the purpose of the Reo is to bind to the concrete footing. Depending on the wall height the size and number of Reo will vary</p> <p>Example: 600mm Wall Height 600mm of post above ground 350mm sleeper tab under ground 300mm of Reo under ground</p> 	N642	5.92kg	\$65.00

<p>Refer to the installation guide available in-store or on Nuway's website. The recommended wall heights shown are a guide only. Consideration needs to be given to variables such as soil type (ie igneous rock, clay, sand, etc) type of backfill/subgrade material to be used and whether the wall is weight bearing. Seek engineering advice for walls over 1m high or where soil, backfill and subgrade type may affect the stability of the wall.</p>
